Suspension Tube

1 in OD · 23.5 in Long · 5/8-18 in Female Thread · Chromoly · Black Powder Coat

PART NUMBER
TIP2520-235
View on PriceGuidePro ›

OVERVIEW

Suspension tubes locate the axle and control how the chassis moves through a corner, so their length and thread condition directly set your bite and roll steer. Every one is adjusted, removed, and reinstalled constantly through a season of setup changes. Swedged ends and clean threads let you make precise length changes without fighting seized hardware.

Keeping spare lengths on hand means a bent tube after contact does not end the night.

Beef up your radius rods on the left front side with the new HD Steel Radius Rods for a stronger, more durable part over the standard aluminum rods. These radius rods are made using 1-1/8 Inch O.D. 4130 chromoly and are black Powdercoat.

SPECIFICATIONS

Material	**Chromoly**
Finish	**Black Powdercoat**
Thread	**5/8-18 Female**
Product Length	**23.5 Inch**
