### OVERVIEW

The dust cover keeps dirt and water out of the hub bearing cavity, protecting the bearings and grease that keep a wheel turning. Without it, contamination reaches the bearing quickly. Screw-in designs seal positively rather than relying on friction fit.

Aluminum construction stands up to the pressure washing every race weekend brings.

Screw-In Dust Cap with Ti22 Logo. These black anodized direct-mount front hubs are forged from weight-saving 2024-T3 aluminum and CNC-machined to precise tolerances. Kits include left hub with rotor mount, right hub without rotor mount, bearings, seals, wheel studs, nuts, and threaded Ti22 screw-in dust caps.

### SPECIFICATIONS

|                  |                                     |
|------------------|-------------------------------------|
| Material         | Aluminum                            |
| Finish           | Black Anodized                      |
