OVERVIEW

Bolts are the primary fastener across the chassis, suspension, and driveline, with every one sized for a specific load and application. Using the wrong grade or length turns a routine joint into a failure point. Titanium and quality steel options let you choose weight savings or maximum strength per location.

Fasteners are replaced on teardown, so keeping sets on hand is routine.

Front Wheel Stud, 3/8 Inch-16. These black anodized direct-mount front hubs are forged from weight-saving 2024-T3 aluminum and CNC-machined to precise tolerances. Kits include left hub with rotor mount, right hub without rotor mount, bearings, seals, wheel studs, nuts, and threaded Ti22 screw-in dust caps.

SPECIFICATIONS

Material	**Chromoly**
Finish	**Black Powdercoat**
Thread	**3/8-16**
Head Style	**Allen Head**
Product Length	**1.250 Inch**
Vehicle Type	**Universal**
Sold As	**Each**

SHIPPING & PACKAGING

Package	**4.4 × 4 × 0.7 in**
Ship Weight	**0.06 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
