King Pin Bearing and Race Kit

TI22 King Pins and Spindles

PART NUMBER
TIP2840
View on PriceGuidePro ›

OVERVIEW

The king pin bearing and race kit carries steering loads while letting the spindle pivot freely, making it central to how the front end feels. Worn bearings introduce play that shows up as vague steering. Matched bearings and races ensure correct fit and preload.

These are wear items, refreshed as part of front end maintenance.

King pin bearing and race kit for Ti22 king pins and spindles. Supplied as a complete kit.
