Spindle Nut Lock Screw

10-32 Thread · 1/2 in Long · Socket Head · Steel · Zinc Plated · Ti22 Direct Mount Front Hubs

PART NUMBER
TIP2857
View on PriceGuidePro ›

OVERVIEW

Lock screws secure the spindle nut against rotation, providing the positive retention that thread friction alone cannot. Losing a spindle nut means losing a wheel. Correct screw size and count match the nut design being used.

Small, critical, and cheap, so spares belong in the toolbox.

Lock Nut Set Screws, Two.
