Spindle Bushing

10 Degree Front Spindles

PART NUMBER
TIP2860
View on PriceGuidePro ›

OVERVIEW

Spindle bushings are the bearing surface the king pin rides in, carrying steering loads while allowing free pivot. A worn bushing introduces play felt directly as vague steering. Correct material and fit keep the pivot tight without binding.

Bushings are wear items replaced during front end service.

Spindle Bushing, Each. Forged 7075-T6 aluminum 9 Degree spindles with Ti22 logo on the top, 3-1/4 Inch bolt spacing, and straight snouts. Available with either titanium or steel snouts.
