# Grease Fitting

Flush Style · Straight · 1/4-28 in Thread · Steel · Zinc Oxide

PART NUMBER
**TIP2872**
View on PriceGuidePro ›

## OVERVIEW

Grease fittings are how you get lubricant into birdcages, king pins, and bearings without disassembly, making them the reason those parts survive a season. A blocked or broken fitting means a bearing runs dry and fails. Correct angle and thread let a grease gun reach the fitting in tight spaces.

Sold in sets because they are small, easily damaged, and needed in quantity.

Grease Fitting Flat, Straight, Set of 4.
