WHEELS AND TIRES › WHEELS › WHEEL CENTER SECTIONS

Wheel Center

Rear · 42 Spline · Aluminum · Black Anodized

PART NUMBER
TIP2890
View on PriceGuidePro ›

OVERVIEW

The wheel center is the structural hub of the wheel, carrying every cornering and braking load from the rim into the axle. A cracked or flexing center is a wheel failure waiting to happen. Forged and CNC-machined construction gives strength beyond the original part.

Correct bolt pattern is what makes it fit your rims.

This 100 percent CNC-machined black wheel center is manufactured from forged 2024-T3 aluminum. Fits most popular brands of Wide 5 rear wheels, and is stronger than the original center. Sold individually.

SPECIFICATIONS

Material	**Aluminum**
Finish	**Black Anodized**
Spline	**42 Spline**
Location	**Rear**
Sold As	**Each**

SHIPPING & PACKAGING

Package	**12.5 × 12.5 × 4.9 in**
