Pitman Arm

Heavy Duty · Straight Broach · Aluminum · Black Anodized · Sprint Car

PART NUMBER
TIP3054
View on PriceGuidePro ›

OVERVIEW

The Pitman arm converts steering box rotation into the linear push and pull that moves the drag link, carrying every steering input and every hit the front wheels take. Flex or failure here means losing steering feel at exactly the wrong moment. Billet aluminum construction with a correct angle broach sets the geometry and holds it under load.

Length options let you tune steering ratio to driver preference.

Ti22's HD Pitman Arms are machined from 1 Inch thick 2024 aluminum. The arm tapers from 1 Inch to 3/4 Inch to reduce potential flex. Straight or 10 Degree angle broached arms are offered.

SPECIFICATIONS

Material	**Aluminum**
Finish	**Black Anodized**
Head Style	**Straight Broach**
Style	**Heavy Duty**
Vehicle Type	**Sprint Car**
Sold As	**Each**

SHIPPING & PACKAGING
