Wheel Bearing

Inner / Outer · REM Finished · Steel · Ti22 Sprint Wheel Hub

PART NUMBER
TIP3574
View on PriceGuidePro ›

OVERVIEW

Wheel bearings carry the entire cornering and vertical load of the car while letting the wheel spin freely. A failing bearing generates heat, drags, and can seize a wheel at speed. Quality races and correct preload are what determine bearing life on a dirt track.

Bearings are inspected at every teardown and replaced at the first sign of roughness.

Hub bearing and race kit for mini sprint hubs, REM finished. Inner and outer bearings, steel. Sold as a pair.

SPECIFICATIONS

Material	**Steel**
Location	**Inner / Outer**
Fits Application	**Ti22 Sprint Wheel Hub**
Sold As	**Pair**
