Wheel Stud

5/16-18 in Thread · 1.500 in Long · Nuts Included · Titanium · Natural

PART NUMBER
TIP3576
View on PriceGuidePro ›

OVERVIEW

Wheel studs carry every cornering and braking load from the wheel into the hub through a small number of fasteners. A failed stud can free a wheel at speed, making these safety-critical. Correct thread, length, and head style are what let the stud clamp properly.

Titanium options cut rotating unsprung weight.

Mini sprint front wheel studs and nuts, titanium. 5/16 Inch-18 thread, 1.500 Inch long, nuts included. Set of 4.

SPECIFICATIONS

Material	**Titanium**
Finish	**Natural**
