Torsion Arm Stop

0.875 in Spline · Hardware Included · Aluminum · Black Anodized · Micro / Mini

PART NUMBER
TIP3601
View on PriceGuidePro ›

OVERVIEW

A torsion stop locks the torsion bar to the arm and sets the preload that determines how a corner carries weight, making it one of the most frequently adjusted parts on the car. A stop that slips or rounds its splines changes your setup mid-race with no obvious cause. Secure spline engagement and quality hardware are what keep the adjustment where you put it.

Stops get wrenched constantly, so material choice affects how long they stay accurate.

Torsion stop is CNC-machined from billet aluminum and incorporates a high-grade, full-thread stainless steel bolt with nut to provide exact adjustments. The bolt end is additionally relieved to prevent mushrooming. Choose from natural or black finish.

SPECIFICATIONS

Material	**Aluminum**
Finish	**Black Anodized**
Spline	**0.875 Inch Spline**
Vehicle Type	**Micro / Mini**
Hardware Included	**Hardware**
Sold As	**Each**
