OVERVIEW

The torsion arm transfers wheel movement into the torsion bar, making it the link that determines how each corner of the car carries load. Any flex or slop here shows up as inconsistent bite that no amount of setup change will fix. Precise machining keeps the spline and pickup points where the setup sheet expects them, lap after lap.

Arms take direct hits in contact, so a spare set in the trailer is cheap protection against a lost feature.

Specific to panhard rear axle assemblies, rigid 2024 aluminum arm provides a structurally stout piece. Arm has no offset and includes an integrated spacer on the end to allow a full range of motion. Will not work with Watts link style rear end.

Choose from polished or black anodized.

SPECIFICATIONS

Material	**Aluminum**
Finish	**Black Anodized**
Product Length	**11.125 Inch**
Spline	**7/8 Inch Spline**
Location	**Rear - Driver Side**
Vehicle Type	**Micro / Mini**
Hardware Included	**Hardware**
Sold As	**Each**

WHAT'S INCLUDED

- ✔ Hardware

SHIPPING & PACKAGING

Package	**12.65 × 6.05 × 1.4 in**
Ship Weight	**0.99 lb**
Country of Origin	**USA**
Vehicle Type	**Car**

ALSO AVAILABLE IN THIS FAMILY (2 PART NUMBERS)
