Shifter Stick

Chromoly · Black Powder Coat · Micro / Mini

PART NUMBER
TIP3812
View on PriceGuidePro ›

OVERVIEW

The shifter stick is the lever the driver moves to select gears, so its length and position determine how naturally the shift falls to hand. A poorly placed stick costs time on every shift. Chromoly construction handles the force applied in a hurry.

Side-specific designs match chassis layout.

Shift Lever, Fits Left Side of Chassis, 4130 Chrome Moly, Black.

SPECIFICATIONS

Material	**Chromoly**
Alloy Grade	**4130**
