Axle Sprocket

53 Tooth · 5.25 in Bolt Pattern · Aluminum · Natural · Micro Sprint

PART NUMBER

TIP3840-53

View on PriceGuidePro >

OVERVIEW

The rear sprocket sets final drive ratio, which is the single fastest way to match engine power to a given track length and grip level. Teams carry a range of tooth counts and swap them between sessions as the surface changes. Hardened aluminum keeps the mass down on a part that rotates with the axle while still holding tooth profile against chain load.

Running a worn sprocket with a fresh chain destroys both, so replacing them as a set is standard practice.

Sprockets are manufactured from hardened aluminum for improved durability without added weight. Sprockets feature 5.25 Inch bolt circle with 5/16 Inch pre-drilled holes. Fits Triple X and other mini sprint sprocket hubs.

SPECIFICATIONS

Material	Aluminum
Finish	Natural
Bolt Pattern	5.25 Inch
Tooth Count	53 Tooth
Vehicle Type	Micro Sprint
Sold As	Each

SHIPPING & PACKAGING

Package	10.75 x 10.75 x 0.4 in
Ship Weight	1.11 lb
Country of Origin	USA
Vehicle Type	Car
