Axle Sprocket

58 Tooth · 6.43 in Bolt Pattern · Aluminum · Natural · Micro Sprint

PART NUMBER
TIP3841-58
View on PriceGuidePro ›

OVERVIEW

The rear sprocket sets final drive ratio, which is the single fastest way to match engine power to a given track length and grip level. Teams carry a range of tooth counts and swap them between sessions as the surface changes. Hardened aluminum keeps the mass down on a part that rotates with the axle while still holding tooth profile against chain load.

Running a worn sprocket with a fresh chain destroys both, so replacing them as a set is standard practice.

Sprockets are manufactured from hardened aluminum for improved durability without added weight. Sprockets feature 6.43 Inch bolt circle with 5/16 Inch pre-drilled holes. Fits Triple X and other mini sprint sprocket hubs.

SPECIFICATIONS

Material	**Aluminum**
Finish	**Natural**
Bolt Pattern	**6.43 Inch**
Tooth Count	**58 Tooth**
Vehicle Type	**Micro Sprint**
Sold As	**Each**

SHIPPING & PACKAGING

Package	**11.8 × 11.75 × 0.5 in**
Ship Weight	**1.20 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
