Rock Screen

22.75 x 8.5 in · Titanium · Natural · Micro / Midget

PART NUMBER
TIP3885
View on PriceGuidePro ›

OVERVIEW

A rock screen is the driver's windshield, taking the direct hit from every clod and stone thrown by the car ahead. Because it sits high and forward, its weight affects how the car reacts. Titanium and chromoly rod give the strength to stop debris while keeping mass down and preserving forward visibility.

This is a safety part first, so build quality matters more than price.

Engineered for Mini-Sprints or Midgets, Rock Screen is 22-3/4 Inch x 8-1/2 Inch in size and manufactured from lightweight titanium rod. Offers the driver superior protection from rocks and debris.

SPECIFICATIONS

Material	**Titanium**
Finish	**Natural**
