Birdcage

Driver Side · 1.965 in ID Bearing · 6 in Bolt Hole Center to Center · Bearing / Bolts / Snap Ring · Aluminum · Black Anodized · Micro / Mini

PART NUMBER
TIP3905
View on PriceGuidePro ›

OVERVIEW

The birdcage is the rotating hub that ties the torsion arm, radius rods, and shock to the rear axle, so everything the chassis does on corner entry passes through it. A cage that flexes or binds bleeds off horsepower and dulls the driver's feel. Precision bearings and a machined billet housing keep those pickup points located exactly where the setup expects.

Sold side-specific, so the correct hand matters when ordering.

Rigidly constructed, CNC-machined billet aluminum birdcages feature a double-bearing design with a 6 Inch spread between the torsion bar mount and radius rod mount. Sold complete with bearings, snap ring, and bolts. Black anodized finish.
