Axle Spacer

0.5 in Wide · Straight · 1.75 in ID · Aluminum · Black Anodized · 1-7/8 in Micro / Mini Axles

PART NUMBER
TIP3931
View on PriceGuidePro ›

OVERVIEW

Axle spacers set wheel spacing and protect the axle and bearing shoulders from the wear that comes with repeated wheel changes. Getting spacing right is what keeps your stagger and track width where you set them. Anodized aluminum resists the galling that turns a spacer into a seized part on the axle.

Teams typically carry a range of widths so track width can be adjusted without new hardware.

Engineered for use with 1-7/8 Inch axles, 27-spline spacers are 1-3/4 Inch I.D. and are offered in a variety of widths. Black anodized. Sold each.

SPECIFICATIONS
