OVERVIEW

Bumpers and nerf bars are the first thing to make contact in traffic, protecting wheels, tires, and chassis tubes from damage that would otherwise end a night. They have to absorb a hit and stay attached without transferring the load into the frame. Swedged ends drop into the chassis for a clean fit, and a straight replacement gets a car back out between races.

Anyone racing in traffic treats these as regularly replaced hardware.

Manufactured from durable stainless steel and polished to perfection. Universal design allows mounting to a variety of chassis.

SPECIFICATIONS

Material	**Stainless**
Finish	**Natural**
Style	**Stacked**
Tube Size	**0.75 Inch**
Location	**Front**
Vehicle Type	**Micro / Mini**
Sold As	**Each**
