OVERVIEW

Bumpers and nerf bars are the first thing to make contact in traffic, protecting wheels, tires, and chassis tubes from damage that would otherwise end a night. They have to absorb a hit and stay attached without transferring the load into the frame. Swedged ends drop into the chassis for a clean fit, and a straight replacement gets a car back out between races.

Anyone racing in traffic treats these as regularly replaced hardware.

Rear Bumper without Basket. 0.75 Inch tube, stainless steel, natural finish. For 600 mini sprint.

Sold each.
