Brake Caliper Bracket

Front · Driver Side · Hardware Included · Aluminum · Black Anodized · 10-1/8 in Rotor · 3-1/4 in Lug Mount Calipers · Midget

PART NUMBER

TIP4012

[View on PriceGuidePro >](#)

OVERVIEW

Caliper brackets locate the brake caliper relative to the rotor, holding it square under the full force of every stop. A bracket that flexes causes uneven pad wear and an inconsistent pedal. Billet aluminum construction handles braking loads while keeping weight off the unsprung corner.

Correct spacing for your rotor diameter is what makes the caliper sit right.

Caliper mounts are spaced at 3-1/4 Inch and will work with 10-1/8 Inch and 10-7/8 Inch rotors. Steel mounting bolts included.

SPECIFICATIONS

Material	Aluminum
Finish	Black Anodized
Rotor Size	10-1/8 Inch
Mount Type	3-1/4 Inch Lug Mount Calipers
Location	Front - Driver Side
Vehicle Type	Midget
Hardware Included	Hardware
Sold As	Each

WHAT'S INCLUDED

✓ Hardware
