Brake Caliper Bracket

Front · Driver Side · Hardware Included · Aluminum · Clear Anodized · 10-1/8 in Rotor · 3-1/4 in Lug Mount Calipers · Midget

PART NUMBER
TIP4013
View on PriceGuidePro ›

OVERVIEW

Caliper brackets locate the brake caliper relative to the rotor, holding it square under the full force of every stop. A bracket that flexes causes uneven pad wear and an inconsistent pedal. Billet aluminum construction handles braking loads while keeping weight off the unsprung corner.

Correct spacing for your rotor diameter is what makes the caliper sit right.

Designed to provide quick brake line disconnection without fluid loss or air ingestion. Aluminum dry brake couplings are offered in 3 AN or 4 AN versions.

SPECIFICATIONS

Material	**Aluminum**
Finish	**Clear Anodized**
Rotor Size	**10-1/8 Inch**
Mount Type	**3-1/4 Inch Lug Mount Calipers**
Location	**Front - Driver Side**
Vehicle Type	**Midget**
