Rotor Mount

3 x 5.00 in Bolt Circle · Inboard · 42 Spline · Aluminum · Black Anodized · Sprint Car Right Rears

PART NUMBER
TIP4018
View on PriceGuidePro ›

OVERVIEW

The rotor mount locates the brake rotor on the axle, transferring braking torque into the driveline. A mount that wears or flexes lets the rotor move, damaging both parts. Splined billet designs engage the axle positively.

Correct spline count and bolt pattern are what make it fit.

Durable billet aluminum adapters accept most popular rotors. Designed for rear inboard mounting, adapters are black anodized. Sold individually.

SPECIFICATIONS

Material	**Aluminum**
Finish	**Black Anodized**
Overall Dimensions	**3 x 5.00 Inch Bolt Circle**
Spline	**42 Spline**
Location	**Inboard**
Sold As	**Each**

SHIPPING & PACKAGING

Package	**6.1 × 5.55 × 0.65 in**
Ship Weight	**0.33 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
