# Brake Hub Bolt and Lock

5/16-18 in Thread · 1.25 in Long · 12 Point Head · Nuts Included · Steel · Black Oxide

PART NUMBER
**TIP4026**
View on PriceGuidePro ›

## OVERVIEW

These bolts and T-nut locks hold the brake rotor to its adapter, carrying braking torque into the driveline. A loose bolt lets the rotor move, which destroys both rotor and adapter. Floating T-nut designs let the assembly self-align while staying tight.

Replacement sets let you refresh the hardware without replacing the adapter.

Replacement bolt and lock for TIP4025 brake rotor adapter. Set includes (1) bolt and (1) T-nut.
