Seat Spacer

1/4 to 2 in · Aluminum · Black Anodized · Sprint Car

PART NUMBER
TIP4140
View on PriceGuidePro ›

OVERVIEW

Seat spacers set the driver's position in the car, which affects both weight distribution and how well the driver can work the controls. Small changes in seat position move meaningful weight in a car this light. Spacer kits give you a range of thicknesses so position can be tuned rather than accepted.

Chassis-specific versions fit the bar sizes different builders use.

Seat Back Spacer Kit, 1/4 Inch to 2 Inch, 5 pcs.
