Tire Pressure Relief Valve

5/8 in Wheel Hole · Aluminum · Natural · Schrader / Tire Pressure Relief Valves

PART NUMBER
TIP4400
View on PriceGuidePro ›

OVERVIEW

Wheel disconnects let you check and adjust tire pressure without pulling a valve stem cap or fighting for access behind a beadlock ring. Stagger changes as the tires heat and cool, so being able to bleed pressure quickly between hot laps directly affects how the car turns. This aluminum unit fits a 5/8 Inch wheel hole and works with pneumatic bleeders for consistent, repeatable settings.

Faster pressure checks mean more time for everything else in the pit box.

Wheel Disconnect, Black Aluminum.

SPECIFICATIONS
