Sealing Washer

Rubber / Steel · Tire Pressure Relief Bleeder

PART NUMBER
TIP4408
[View on PriceGuidePro >](#)

OVERVIEW

Sealing washers seal the joint at a wheel disconnect or fitting so air or fluid does not weep past the threads. A failed washer means a slow leak that is hard to trace. Steel and rubber composite designs seal while handling clamping load.

Sold in packs because they are replaced whenever a fitting comes apart.

Sealing Washers, 4 Pk, Steel / Rubber.
