Tire Pressure Relief Valve Grommet

Rubber · Black · Ti22 Tire Pressure Relief Valves

PART NUMBER
TIP4409
View on PriceGuidePro ›

OVERVIEW

The grommet seals the relief valve where it passes through the wheel, keeping air in and dirt out. A hardened or torn grommet causes a slow leak that changes stagger over a race. Rubber construction seals against the wheel face while absorbing vibration.

Sold in packs because they are replaced whenever a valve is serviced.

Valve Grommets, 4 Pk, Rubber.
