Tire Pressure Relief Valve Plug

PART NUMBER
TIP4410
View on PriceGuidePro ›

OVERVIEW

Bleeder plugs seal a relief valve when not in use, preventing the slow leak an open valve would cause. Losing pressure mid-race changes how the car turns. Plastic plugs seal positively and remove by hand for a quick pressure check.

Small consumables, so packs make sense.

Bleeder Plugs, 2 Pk, Plastic. Wheel disconnects allow for use of pneumatic bleeders to maintain constant air pressure and consistent stagger, and can also be used for quick filling. Available in black aluminum or white plastic, and sold individually or in sets of 4.

Additional accessories and replacement parts also available.

SPECIFICATIONS

Sold As	**Pair**

SHIPPING & PACKAGING

Package	**4 × 2.05 × 0.75 in**
