Tire Pressure Relief Valve Screen

PART NUMBER
TIP4413
View on PriceGuidePro ›

OVERVIEW

The valve screen keeps debris out of the relief valve mechanism so it seals reliably each time it closes. Grit in a valve seat is exactly what causes a slow leak. Thread-on aluminum screens filter without restricting airflow.

These are inexpensive protection for a component that controls tire pressure.

Thread-On Bleeder Screen, Aluminum. Wheel disconnects allow for use of pneumatic bleeders to maintain constant air pressure and consistent stagger, and can also be used for quick filling. Available in black aluminum or white plastic, and sold individually or in sets of 4.

Additional accessories and replacement parts also available.

SPECIFICATIONS

Sold As	**Each**

SHIPPING & PACKAGING

Package	**4.05 × 2.45 × 0.55 in**
Ship Weight	**0.02 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
