Schrader Valve

Aluminum · Natural

PART NUMBER
TIP4415
View on PriceGuidePro ›

OVERVIEW

Schrader valves are the actual valve core that holds air in the tire, and a leaking core loses pressure over a race distance. Because tire pressure directly affects stagger and grip, a slow leak changes how the car turns. Aluminum-bodied valves resist the corrosion that makes a core stick.

Sold in pairs because they are replaced as sets.

Schrader Valves, 2 Pk, Aluminum.

SPECIFICATIONS

Material	**Aluminum**
Finish	**Natural**
Sold As	**Pair**

SHIPPING & PACKAGING

Package	**4.05 × 2.2 × 0.7 in**
Ship Weight	**0.04 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
