Mud Cover Installation Kit

Screw-In Inserts · Steel Nut · Aluminum · Black Anodized

PART NUMBER
TIP4448
View on PriceGuidePro ›

OVERVIEW

Mud cover install kits provide the inserts, rivets, and fasteners that hold a wheel cover in place through a full race. Covers keep mud out of the wheel, which protects both stagger and rotating balance. Having the correct hardware means a cover goes on tight without damaging the wheel.

These are consumable kits, replaced as covers are swapped.

This 100 percent CNC-machined black wheel center is manufactured from forged 2024-T3 aluminum. Fits most popular brands of Wide 5 rear wheels, and is stronger than the original center. Sold individually.

SPECIFICATIONS
