Torque Ball Housing

Retaining Collar / Rubber Boot Included · Aluminum / Steel · Torque Ball Assembly

PART NUMBER
TIP4710
View on PriceGuidePro ›

OVERVIEW

The torque ball housing contains the torque ball and, critically, retains driveline debris if a U-joint fails, protecting the driver. It also locates the driveline relative to the firewall. Rigid construction is what makes that containment reliable.

This is a safety component as much as a driveline part.

Assembly includes stamped steel firewall housing, hydroformed aluminum torque ball, rubber torque ball dust boot, forged aluminum retaining collar, and 4 highnuts. Weighs 4 lbs. 2 oz.

SPECIFICATIONS

Material	**Aluminum / Steel**
Style	**Torque Ball Assembly**
Product Weight	**4 Pound 2 Ounce**
Hardware Included	**Retaining Collar / Rubber Boot**
Sold As	**Kit**

WHAT'S INCLUDED

- ✔ Retaining Collar
- ✔ Rubber Boot
