Torque Ball

Hydroformed · Aluminum · Natural · Torque Ball Assembly

PART NUMBER
TIP4720
View on PriceGuidePro ›

OVERVIEW

The torque ball is the spherical joint that lets the torque tube pivot with suspension movement while transmitting engine torque. A worn ball allows driveline misalignment that damages U-joints and seals. Hydroformed aluminum construction handles the load while keeping weight down.

Correct size matches the housing being used.

Assembly includes stamped steel firewall housing, hydroformed aluminum torque ball, rubber torque ball dust boot, forged aluminum retaining collar, and 4 high-nuts. Weighs 4 Pound 2 Ounce.

SPECIFICATIONS

Material	**Aluminum**
Finish	**Natural**
Style	**Torque Ball Assembly**
Sold As	**Each**

SHIPPING & PACKAGING

Package	**11 × 8.4 × 8.4 in**
Ship Weight	**1.79 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
