Torque Ball Retaining Collar

Aluminum · Natural · Torque Ball · Sprint Car

PART NUMBER
TIP4722
View on PriceGuidePro ›

OVERVIEW

The retaining collar holds the torque ball in its housing, keeping the driveline located under load. A collar that loosens lets the ball move and wears the housing. Forged aluminum construction handles the load while keeping weight down.

Replaced whenever the ball or housing is serviced.

Assembly includes stamped steel firewall housing, hydroformed aluminum torque ball, rubber torque ball dust boot, forged aluminum retaining collar, and 4 high-nuts. Weighs 4 Pound 2 Ounce.

SPECIFICATIONS

Material	**Aluminum**
Finish	**Natural**
Vehicle Type	**Sprint Car**
Sold As	**Pair**

SHIPPING & PACKAGING

Package	**8.05 × 6.4 × 2.6 in**
Ship Weight	**0.66 lb**
