Torque Ball High Nut

5/16-18 in Thread · Steel · Black Powder Coat · Torque Ball Assembly

PART NUMBER
TIP4724
View on PriceGuidePro ›

OVERVIEW

High nuts retain the torque ball housing, carrying driveline loads through the firewall mount. A loose nut lets the housing move, which misaligns the driveline. Extra thread length gives more engagement than a standard nut.

Sold in the counts a housing requires.

Torque Ball High Nut, 5/16-18 Inch Thread, Steel, Black Powdercoat, Torque Ball Assembly. Set of 4.
