Torque Ball Housing Stud Kit

5/16-18 in Thread · 1 in Long · Steel · Black Oxide

PART NUMBER
TIP4726
View on PriceGuidePro ›

OVERVIEW

The stud kit anchors the torque ball housing to the firewall, carrying driveline loads and containment forces. A failed stud compromises both alignment and the housing's protective function. Correct base and top threads let the stud thread into the housing while accepting a proper nut.

Kits include the washers and nuts needed.

These housings are very rigid and strong to retain debris in the event of a U-joint failure. The torque ball is CNC-machined for strength and durability.

SPECIFICATIONS

Material	**Steel**
Finish	**Black Oxide**
Thread	**5/16-18**
Product Length	**1 Inch**
Sold As	**Set of 4**

SHIPPING & PACKAGING

Package	**4 × 2 × 0.7 in**
Ship Weight	**0.14 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
