Helmet Tear Off Post

Locking · Set Screw · Aluminum · Natural

PART NUMBER
TIP4900
View on PriceGuidePro ›

OVERVIEW

Tear off posts hold the laminated tear offs on a helmet shield, and a post that loosens mid-race leaves a driver unable to clear mud from their vision. Being able to pull a clean tear off is a safety issue as much as a convenience. Locking designs stay put through the vibration and impact of a feature.

Two posts per kit covers a single shield.

Quick adjusting, true locking tear-off post eliminates the problem of loose tear-offs on any helmet. Makes installing tear-offs very quick. Includes installation tool.

Two posts per kit.

SPECIFICATIONS

Material	**Aluminum**
Finish	**Natural**
Style	**Locking**
Sold As	**Kit**

SHIPPING & PACKAGING

Package	**4.05 × 2.1 × 0.65 in**
Ship Weight	**0.03 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
