OVERVIEW

A fuel filter is the last line of defense between the tank and an injector, and methanol systems pick up debris from every fill, tank swap, and rebuild. A plugged or bypassing filter leans the engine out, which gets expensive fast. A cleanable stainless element lets you inspect and reuse rather than replacing a throwaway cartridge.

Correct AN sizing keeps the plumbing run tidy and unrestricted.

In-Tank Filter, 90 Degree Rotating 3/4 Inch Slip-On Style Inlet. Manufactured with 60-micron pleated stainless mesh filter.

SPECIFICATIONS

Material	**Aluminum**
Finish	**Black Anodized**
Style	**In-Tank, Stainless Element**
Degree	**90 Degree**
Hose Size	**3/4 Inch Hose Barb**
Micron Rating	**60 Micron**
Sold As	**Each**

SHIPPING & PACKAGING

Package	**7.85 × 6.15 × 2.15 in**
Ship Weight	**0.37 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
