Radiator Hose

180 Degree · 1.5 in ID · Silicone · Black · Sprint Car

PART NUMBER

TIP5164

[View on PriceGuidePro >](#)

OVERVIEW

Radiator hoses carry coolant between engine and radiator in an environment of heat, vibration, and constant flexing. A collapsed or split hose puts an engine at risk within a lap. Molded silicone holds its shape under suction and resists heat cycling far better than generic rubber.

Correct bend and diameter mean no kinks and no restriction in the cooling circuit.

Radiator hose, 180 Degree bend, 1.5 Inch I.D. Silicone, black. Sprint car. Sold each.

SPECIFICATIONS

Material	Silicone
Finish	Black
Inside Diameter	1.5 Inch
Degree	180 Degree
Vehicle Type	Sprint Car
Sold As	Each

SHIPPING & PACKAGING

Package	10 x 6.8 x 2.3 in
Ship Weight	0.72 lb
Country of Origin	USA
Vehicle Type	Car
