Injection Wash Plug

2.900 in Stack Diameter · Plastic · Black · Kinsler Beast

PART NUMBER
TIP5278
View on PriceGuidePro ›

OVERVIEW

Wash plugs seal the injection stacks so you can wash methanol residue off an engine without flooding the intake tract. Skipping this step is how water finds a cylinder and turns a routine cleanup into a rebuild. Sized to specific injection bodies, they seat positively and pull out just as easily.

Sold in sets so the whole intake is covered in one pass.

Injection Wash Plugs, Kinsler Beast 2.900.

SPECIFICATIONS

Material	**Plastic**
Finish	**Black**
