Frame Stand

13 to 19 in Tall · Aluminum · Black Powder Coat · Sprint / Mini Sprint

PART NUMBER
TIP5414
View on PriceGuidePro ›

OVERVIEW

Frame stands hold the chassis at a set working height so a crew can work on the car comfortably and safely. Adjustable height also lets you replicate ride height for setup work. Powdercoat steel construction handles the load of a full car.

Sold in pairs because supporting a chassis takes two.

These pit stands work great at both the shop and at the track. Black Powdercoat steel. Sold in pairs.
