Frame Stand Pad

Replacement · Rubber

PART NUMBER

TIP5415

[View on PriceGuidePro >](#)

OVERVIEW

The rubber pad on a frame stand protects the lower chassis rails from the scratches and dents bare steel would cause. Frame rails are structural, so surface damage matters. High-density rubber grips the tube while cushioning the contact.

Pads wear and compress over time, making them a replacement item.

Frame stand and dolly set is built with black Powdercoat steel, making it tough enough for shop duty, but nice enough for showroom use! Adjusts easily from 13 Inch to 19 Inch in height to put a sprint chassis at the ideal working height, while heavy-duty locking casters make it easy to move around the shop, even under heavy loads. High-density rubber pads help prevent scratches on lower frame rails.

Includes all pins, casters, and hardware needed for assembly. Sold in sets of two.

SPECIFICATIONS

Material	Rubber
Style	Replacement
Sold As	Each

SHIPPING & PACKAGING

Package	11.85 x 4.05 x 2.1 in
Ship Weight	0.63 lb
Country of Origin	USA
Vehicle Type	Car
