O-Ring

Rubber · TI22 Shutoff Style In-Line Fuel Filters

PART NUMBER
TIP5522
View on PriceGuidePro ›

OVERVIEW

O-rings seal fittings, dust caps, and filter housings, and a single failed ring means a leak or contamination path. They are the cheapest part in any assembly and the most common cause of a leak. Correct material and size are what let the ring seal without extruding.

Always replaced rather than reused during service.

O-Ring, Rubber, TI22 Shutoff Style In-Line Fuel Filters. Sold in pairs.
