Throttle Arm

5/16 in · Aluminum · Black Anodized · Sprint Car

PART NUMBER
TIP5530
View on PriceGuidePro ›

OVERVIEW

The throttle arm converts linkage movement into injector barrel rotation, making it the last link between pedal and engine. Slop here costs the fine throttle control needed off a slick corner. Machined arms with correct geometry keep that relationship linear.

Correct fit for your injection is what makes it work.

Throttle arm with 5/16 Inch mounting hole. Billet aluminum, black anodized. For sprint car.

Sold each.

SPECIFICATIONS

Material	**Aluminum**
