OVERVIEW

Throttle linkage translates pedal movement into injector barrel position, so its precision is what the driver feels as throttle response. Slop or binding here costs the fine control needed to get off a slick corner cleanly. Rod ends and bell cranks that move smoothly keep the relationship between foot and engine consistent.

Linkage components take vibration constantly, making periodic replacement normal.

These Black Anodized Bell Cranks are ultra-smooth and make for great throttle response. Kit includes 3 aluminum rods, 2 bell cranks, and 6 high-quality mini rod ends.

SPECIFICATIONS

Material	**Aluminum**
Finish	**Black Anodized**
Vehicle Type	**Sprint Car**
Sold As	**Kit**

SHIPPING & PACKAGING

Package	**15 × 3 × 1.5 in**
Ship Weight	**0.50 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
