OVERVIEW

Fittings connect fuel, brake, and coolant lines while sealing against pressure and vibration, so a single weeping fitting can end a night. Correct AN sizing and thread type are what make a leak-free joint without over-tightening. Aluminum bodies keep weight down where dozens of connections add up.

Keeping common sizes in the trailer means a damaged line gets repaired instead of parking the car.

Ti22 straight fittings feature 4 AN male to 1/8 Inch NPT male, and 6 AN male to 6 AN male O-ring. Complete with black anodized aluminum finish.
