Rod End

Spherical · 3/16 in Bore · 10-32 in Right Hand Male Thread · Steel Ball · Aluminum · Black Anodized

PART NUMBER
TIP5656
View on PriceGuidePro ›

OVERVIEW

Rod ends are the pivot at every end of every suspension and steering link, which makes them the most numerous wear point on the car. A worn rod end introduces slop that shows up as vague steering and inconsistent bite. Nylon-insert designs hold tolerance longer than bare metal-on-metal under the constant reversals a dirt car sees.

These are consumables, so most teams replace them on a schedule rather than waiting for failure.

Rod End, 10-32 Thread, RH Male Thread.
