OVERVIEW

The extinguisher mount holds a bottle securely where a crew can reach it fast, which is the only thing that matters in the moment it is needed. A bottle that comes loose in a crash is useless. Clamping mounts secure to chassis tubing without drilling.

Correct tube and bottle diameters are what make the mount hold.

A black anodized aluminum 3-1/2 Inch diameter bottle mount that clamps onto a 1-3/8 Inch diameter chassis tube. The mount helps to keep the bottle secure in a crash.
